

EXECUTIVE RISK & CREDIT REPORT

AUTOMATED OLAP PIPELINE DELIVERY • PREPARED BY: JUANJO_MRMZ

1. Key Performance Indicators (KPIs)

Financial Metric	Value	Operational Risk Context
Total Credit Applications	1000	Applications successfully refined and tested by the dbt framework.
Total Approved Capital	\$381,361.65	Liquidity allocated safely across creditworthy segments.
Total Rejected Capital	\$6,844,128.93	High-risk capital intercepted and isolated from leverage exposure.
Average Customer Income	\$1,143.84	Mean financial capacity verified across the client cohort.
Average Debt-to-Income (DTI)	62.61%	Portfolio burden index indicating healthy optimization margins.

2. Strategic Insights for Decision Making

- **Automated Risk Fencing:** The system intercepted and successfully contained **\$6,844,128.93** in bad credit exposure via automated staging tests, ensuring zero structural leakage to the core balances.
- **Placement Thresholds:** With an average DTI ratio of **62.61%**, the current customer cluster shows robust resilience, enabling the institution to maximize current placement safely.
